Weekly Progress Report			
Topic:	Chatbot – Final Project	Week No.	16
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Main Tasks Assigned:

- Perform final tests on the trained model using the test dataset
- Compile final results, including performance metrics (e.g., accuracy, precision, recall)
- Finalize project report

Work Completed:

This week, we tested the trained model on the test dataset to check its final performance. We recorded metrics like accuracy, precision, and recall to understand how well it works.

Challenges Encountered:

It was challenging to make sure the model worked well for all skin types and product details. Another difficulty was explaining the performance results clearly in the report.

Solutions Implemented:

We reviewed the model's strengths and weaknesses based on the test results. Performance metrics were summarized, and key observations were noted. The project report was finalized with all the findings and conclusions.

Tasks for Next Week:

- Create powerpoint presentation
- Finalized weekly progress reports
- Finalized the code/system
- Record project video documentation (if required)
